

Smoke Detector Verification Form

THIS IS TO BE COMPLETED BY UNIT OWNERS ONLY

It is the unit owners' responsibility to determine the manufacture date of **all** alarms in their unit & replace any that are 10 years or older.

Going forward, it will be the Owner's responsibility to insure that all smoke detectors are replaced at 10 year intervals, or whatever the NFPA recommends for replacement. It is suggested that Owners use a marker to note the dates of manufacture on the inside door of electrical panel for easy reference.
